

FIG. 1

FIG. 2

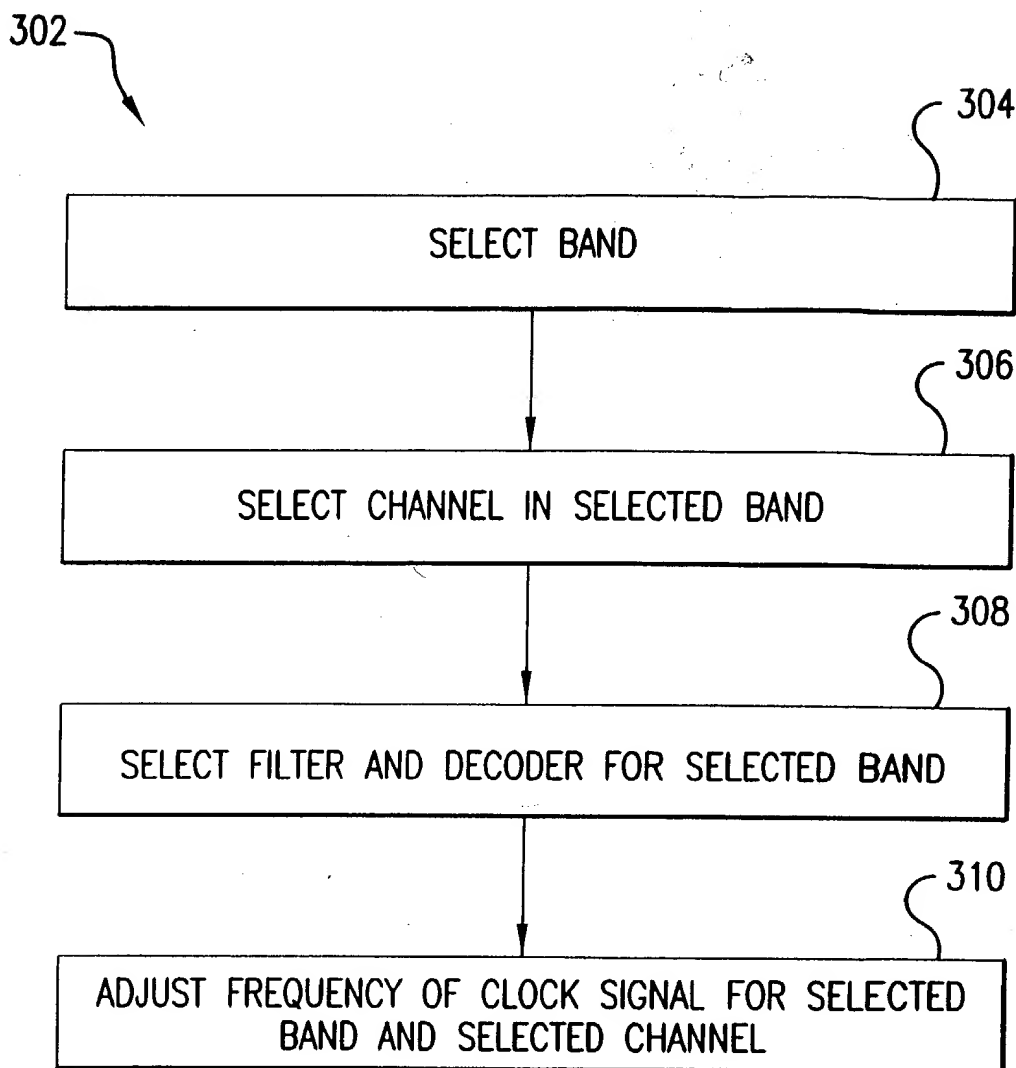

FIG.3

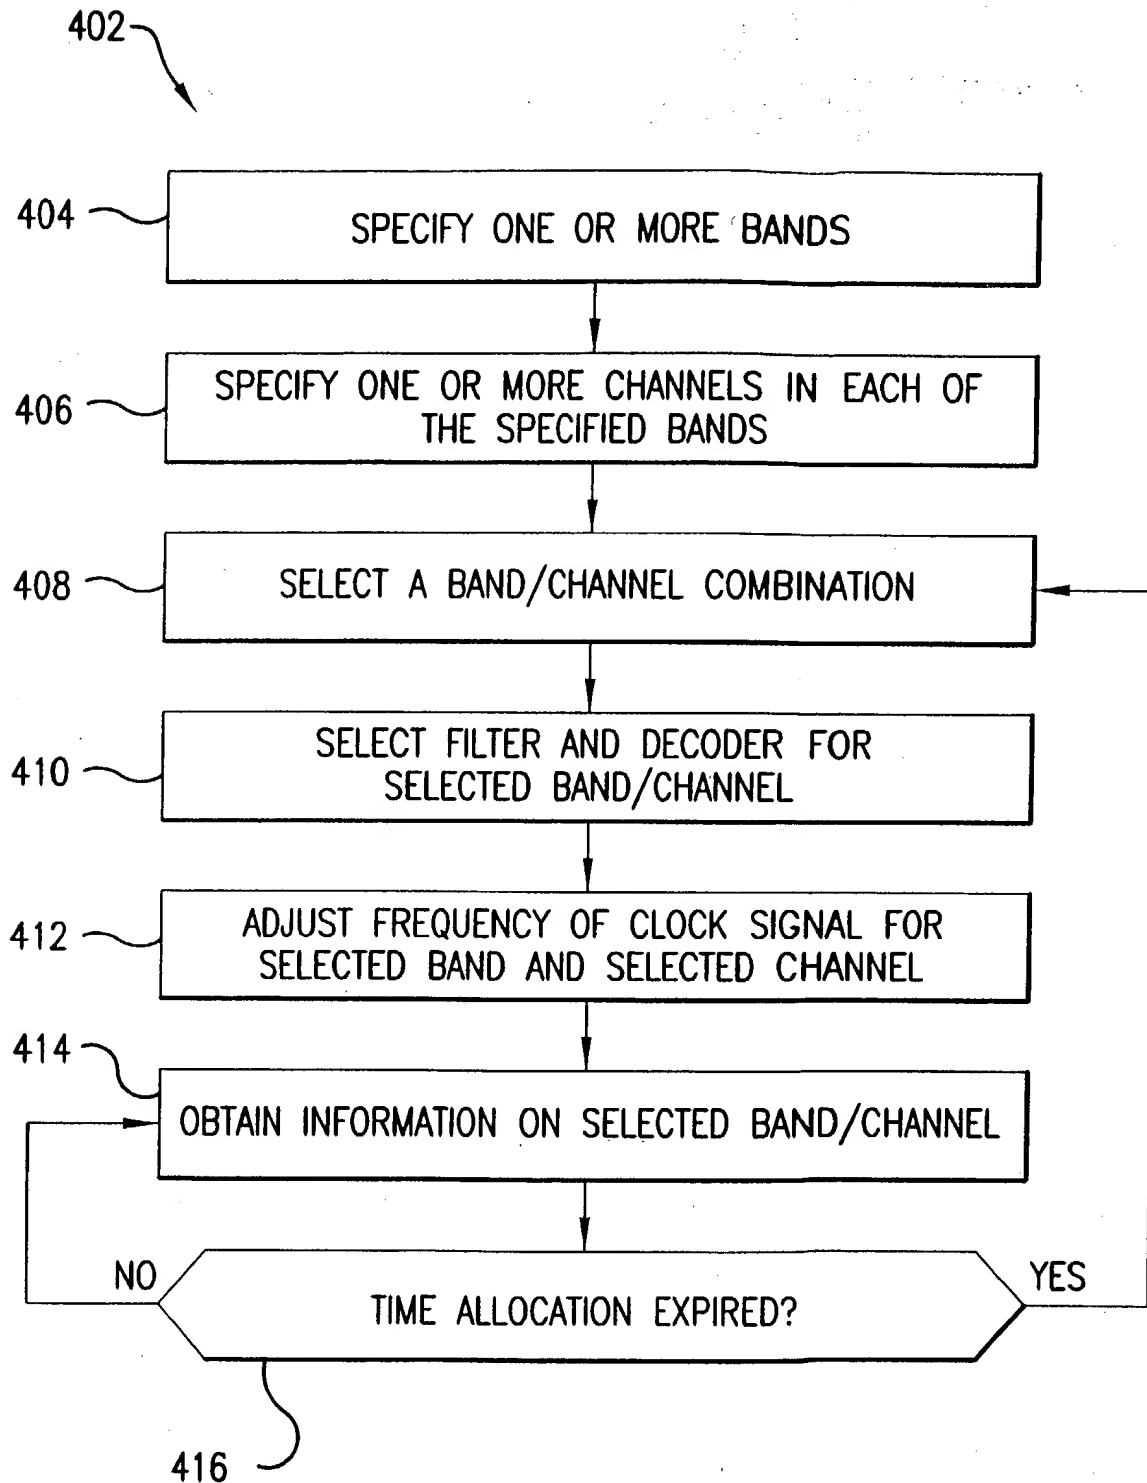

FIG.4

The figure consists of seven horizontal frequency allocation charts, each representing a different radio service. The vertical axis for all charts is frequency in MHz, ranging from 1.0 to 10.0. The horizontal axis represents a scale from 0 to 50. The services and their corresponding frequency allocations are as follows:

- PART 15:** Shows a large block of frequencies from approximately 1.5 MHz to 10.0 MHz.
- STANDARD FREQUENCIES:** Shows specific frequencies for WWV and CHU, with CT1 indicated at the top.
- DISTRESS, CALLING, SEARCH & RESCUE:** Shows a large block of frequencies from approximately 1.5 MHz to 10.0 MHz.
- AMATEUR RADIO:** Shows various frequency bands, including 160M, 80M, 40M, 30M, 20M, 15M, 12M, 10M, and 6M.
- BROADCASTING:** Shows various frequency bands, including 31M, 25M, 21M, 19M, 16M, 13M, 11M, and 9M.
- FIXED AND MOBILE SERVICES:** Shows a large block of frequencies from approximately 1.5 MHz to 10.0 MHz.
- MILITARY:** Shows a large block of frequencies from approximately 1.5 MHz to 10.0 MHz.
- AERONAUTICAL COMMUNICATION & NAVIGATION:** Shows various frequency bands, including 11.7, 1.5, 2.0, 3.0, 4.0, 5.0, 6.0, 7.0, 8.0, 9.0, and 10.0.
- MARITIME COMMUNICATION & NAVIGATION:** Shows various frequency bands, including 11.7, 1.5, 2.0, 3.0, 4.0, 5.0, 6.0, 7.0, 8.0, 9.0, and 10.0.
- SCIENTIFIC & SPACE:** Shows various frequency bands, including 11.7, 1.5, 2.0, 3.0, 4.0, 5.0, 6.0, 7.0, 8.0, 9.0, and 10.0.
